EXTRUSION MACHINE

DEESHA IMPEX

CONTROL PENAL

DEESHA IMPEX Twin Screw Extruders suitable for PVC Pipes, CPVC Pipes, Doors & Window Profiles etc. The extruders are provided with screws with heat balancing system, synchronisation of drives & avoid wastage. The extruders are equipped with vertical feeders allows & use various types of formulations.

DEESHA IMPEX Vacuum Calibrators & Spray Baths Separate arcuit for Vacuum & Water Supply High - low temperature flow level control provided assures superior quality production and energy savings.

DEESHA IMPEX Pipe Haul - off units Pneumatic clamping of pipe for easy operation abo gives efficient traction of pipe Synchronisation between haul off drive and extruder for easy operation and reduction of wastage Multi Belt haul off units provided with 2 / 4 belts & prevent ovality of pipe even for large dia pipe and thin wall pipe

DEESHA IMPEX Pipe cut - off units Thider as well as thinner pipes can be cut without burrs Chaffering an one or both sides is possible in planetary saw Both forward & return movement of the saddle are pneumatically controlled Silent operation.

- Also Offers
1. High Speed Compounding Mixer Cooler
 2. Pipe Waste Grinding - Pulverising Units

COOLING TANK

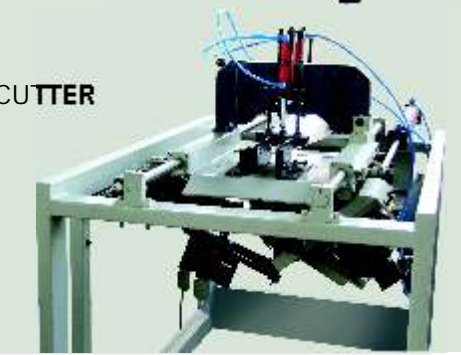

VACUUM TANK

PIPE PULLER

PIPE CUTTER

DEESHA IMPEX series twin screw pipe plant can manufacture quality pipes for various applications like Conducts, Drinking Water, SWR, Industrial, Casing etc.

DEESHA IMPEX makes ultra modern pipe plant operator friendly, which allow processor to produce quality pipes at uniform production at low power consumption.

DEESHA IMPEX Twin Screw Extrusion Technology gives you benefits like...

- High output.
- Lower power consumption per kg output.
- Low maintenance cost.
- Allows various formulations quality product even at commercial formulations.
- Low investment cost.

TWIN SCREW EXTRUSION PLANT FOR PVC/CPVC PIPES

Model	Extruder Drive	Pipe Diameter Range	Production Capacity*
DI-110-170	15 kW AC	16 to 110 mm OD	120-170 Kgs/Hour*
DI-200-250	30 kW AC	63 to 200 mm OD	200-250 Kgs/Hour*

Power Saver Model

DI-250-350	30 kW AC	63 to 200 mm OD	300-350 kgs/Hour*
DI-400-600	45 kW AC	75-250 mm OD	400-450 Kgs/Hour*

*depend upon pipe size and weight
